

**Senate Committee on Environment and Public Works**

The Congressional Budget Act of 1974 requires the Congressional Budget Office, to the extent practicable, to prepare estimates of the budgetary effects of legislation ordered reported by Congressional authorizing committees. In order to provide the Congress with as much information as possible, the attached table summarizes information about the estimated direct spending and revenue effects of some of the legislation that has been ordered reported by the **Senate Committee on Environment and Public Works** during the 117th Congress. The legislation listed in this table generally would have small effects, if any, on direct spending or revenues, CBO estimates. Where possible, the table also provides information about the legislation's estimated effects on spending subject to appropriation and on intergovernmental and private-sector mandates as defined in the Unfunded Mandates Reform Act.
